Child Care Quality Indicators Certified Child Care Center

Group Size, Child/Staff Ratio & Accreditation Status

The size and number of caregivers for each group typically vary throughout the day. Within state regulations, facility directors set a maximum number of children in the group, and the number of caregivers to work with that group. Those numbers are typically reported to parents as group size and staff/child ratio.

In the following tables, please insert the number of children in each age group that your facility serves, and the number of teaching staff for that group. Use the same numbers the Director would report to a parent inquiring about group size and staff/child ratios in the Certified Child Care Center.

NOTE: For multi-site facilities, this form should be completed by the Director of **each facility site.**
